

BRAND IDENTITY KIT

Visual standards for consistent use of the NTA Logistics LLC brand.

Version 1.0 | Reconstructed from supplied master logo artwork

02 Brand Foundation

A practical identity system built from the supplied NTA Logistics logo.

BRAND ESSENCE

Global movement. Reliable execution. Premium logistics.

NTA Logistics should feel established, capable and connected. The visual system combines deep navy for trust, metallic gold for premium service, and electric blue for speed, technology and global reach.

RELIABLE

Clear, dependable and operationally disciplined.

CONNECTED

Built around movement, networks and global reach.

PREMIUM

Confident service with a polished, high-value appearance.

MOMENTUM

Forward motion, speed and transportation expertise.

Recommended brand personality

Professional / Strong / Responsive / Modern / Experienced / Global

03 Logo System

Protect the detail and impact of the master mark.

Use the supplied full-color mark for large-format, digital hero areas, proposals and presentation covers.

CLEAR SPACE

Keep open space around the logo equal to roughly the height of the bottom tagline band.

MINIMUM SIZE

For detailed use, keep the full logo at least 2.25 in wide in print or about 260 px wide on screen.

SMALL-SIZE USE

Below that size, use a simplified NTA symbol or wordmark rather than forcing all details to remain legible.

Do not stretch, skew, recolor arbitrarily, remove the road/globe elements, add new effects, or place the detailed logo over busy photography without a dark contrast field.

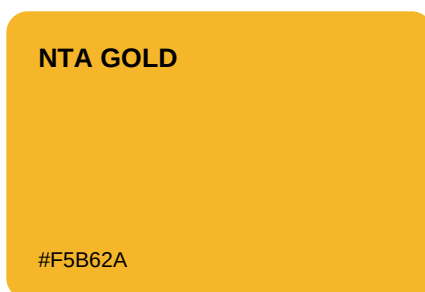

04 Color Palette

Core colors distilled from the supplied logo artwork.

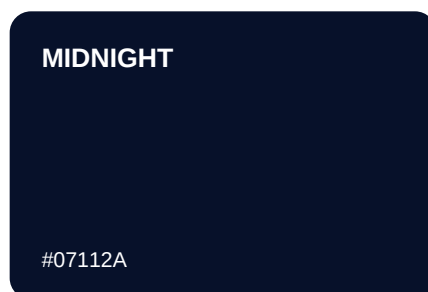

PRIMARY COLORS

Trust, headers, dark brand fields

Primary accent, premium emphasis

Dark backgrounds and contrast

SECONDARY & SUPPORTING COLORS

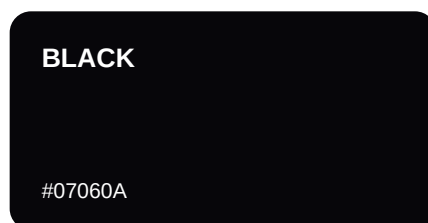

NEUTRALS

WHITE

#FFFFFF

Color balance guideline: lead with navy/midnight, use white or silver for clarity, and reserve gold for emphasis. Electric blue is a supporting accent - not the dominant brand color.

05 Typography

Recommended type system for a consistent, professional identity.

DISPLAY / FORMAL HEADINGS

CINZEL BOLD

Recommended for formal titles, section dividers and premium brand moments. If Cinzel is unavailable, use a classic Roman-style serif with strong capitals.

PRIMARY SANS / BODY / UI

MONTSERRAT SEMIBOLD

Montserrat Regular for body copy, forms and long reading. Montserrat SemiBold or Bold for navigation, labels and calls-to-action.

TYPE SCALE

H1 Global Freight. Delivered With Confidence.

H2 Freight Brokerage & Logistics Solutions

Body Dependable transportation solutions designed to keep freight moving.

DESIGN PRINCIPLES

Dark-first surfaces

Use navy and midnight for hero sections, decks and premium collateral.

Gold with purpose

Use gold on buttons, rules, badges and important labels - not large text blocks.

Clean supporting layouts

Let the detailed logo provide visual richness; keep surrounding layouts controlled and modern.

Motion cues

Use angled lines, roadway-inspired dividers and subtle network motifs sparingly.

07 Brand Voice & Messaging

A communication style that matches the strength of the visual identity.

VOICE	Confident, direct, responsive and operationally knowledgeable.
PROMISE	Make complex freight movement feel controlled, visible and dependable.
AVOID	Overpromising, vague claims, excessive jargon or overly casual language.
PROOF STYLE	Use concrete capabilities, service areas, response times, shipment visibility and customer outcomes.

SAMPLE BRAND LINES

- Freight moves better with a partner who stays ahead of it.
- Built to keep your freight moving - coast to coast and beyond.
- Reliable brokerage. Clear communication. Real momentum.
- Your freight. Our network. One dependable point of contact.

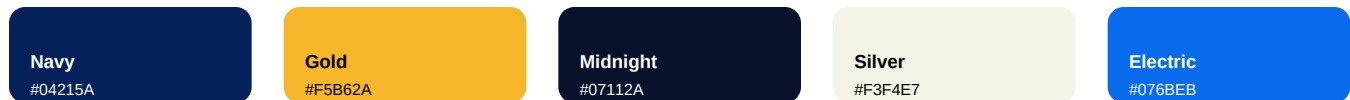

Preferred CTA language: Request a Quote | Speak With Logistics | Track a Shipment | Explore Services

08 Quick Reference

The essential rules to hand to designers, developers and vendors.

CORE PALETTE

TYPE

Cinzel Bold - display / formal headings

Montserrat - body copy / navigation / UI

NON-NEGOTIABLES

Maintain logo proportions. Keep adequate clear space. Use the approved navy/gold palette. Keep layouts clean around the detailed master logo. Use the simplified mark for very small applications. Preserve strong contrast and legibility.

IDENTITY STATUS

This kit is a reconstructed working standard based on the supplied raster logo. Font recommendations and color values are practical brand standards, not verified original designer specifications.
